

Why Become a MicroImages Authorized Reseller?

EXPAND YOUR SERVICES

Get the service and consulting associated with sales of our geospatial analysis products.

MicroImages focuses on development of software and, unlike our competitors, does not engage in competition with our resellers for contracts. Thus our products promote reseller services for you.

www.microimages.com/support/service.htm

FREE PRODUCTS

Each of the TNT analysis products is provided to you for your demonstrations and internal use.

This allows you to learn and demonstrate applications of geospatial analysis. Purchase additional products for your service center at reseller discounts.

www.microimages.com/products/

COMMISSIONS ON SALES

Your sales commissions and our prices are consistent, and special discounting is not permitted.

All TNT professional products (except the free TNTlite) are protected by a software license key that is attached to a USB port. Thus, your service work and marketing plans will not be undermined by pirated or heavily discounted copies of our products from some other source.

LOANERS FOR MARKETING

Place loaners for trial periods.

When you are working closely with a client, let them try our products and services.

www.microimages.com/links/leads.htm

TRAINING CENTER DISCOUNTS

Set up a training center with major savings.

Obtain access to the same deep discounts as academic sites for your training center.

www.microimages.com/links/sal.htm

TIMELY SALES LEADS

Sales leads FAXed weekly for your geographic area for follow up in your language.

You can freely translate our promotional materials and distribute them as your own.

www.microimages.com/links/leads.htm

PRIORITY SUPPORT

Prompt support with first priority given to you.

You will often be the one training and helping our clients in your language, so we both benefit when we get the right answers to you quickly.

www.microimages.com/support/support.htm

STEEP ACADEMIC DISCOUNTS

Help your nation's academic institutions offer training and research in geospatial analysis.

Create a trained cadre of professionals who are literate in geospatial analysis and can apply it in the context of your language, customs, and laws.

FREE PRODUCTS FOR STUDENTS

Download TNTlite for free—not a demo, no time limits.

TNTlite provides free copies of exactly the same programs as the TNT professional products (TNTmips, TNTedit, and TNTview). However, since no USB software license key is used, TNTlite limits the size of the materials: the size of the image, vector, CAD, shape, and TIN objects, and each relational database table.

www.microimages.com/tntlite/

FREE TRAINING MATERIALS

80 tutorial booklets with sample geodata—download or use online.

Your clients can learn advanced geospatial analysis on their own, in the classroom, or via your training programs. 80 tutorials are provided (PDF format) and contain 2000 pages and 4000 color illustrations, together with sample geodata sized to fit in TNTlite.

www.microimages.com/getstart/

FREE TECHNICAL MATERIALS

800 illustrated color plates and 100 Quick Guides—download or use online.

Geospatial analysis operational and technical concepts are discussed in more detail in these 1- or 2-page color plates. Quick Guides are desktop references to special operational shortcuts and features.

FREE ATLAS WEB HOSTING

No web site or you have slow access?

Publish demonstration atlases on the MicroImages web site.

ENTERPRISE OR INDIVIDUAL LICENSES

Portable licenses and the TNT geodata structure are transparent to the OS.

You can operate your personal professional TNT analysis products on any supported computer. Simply attach the software license key to the USB port and install the appropriate Windows, Mac, or Linux version. Or, a floating license can be captured by your networked computer for temporary use from your organization's pool of TNT licenses for use with geodata located anywhere on that local network.
