

International Research Institutes Using the Professional TNT Products

These are some of the research institutes that have purchased TNTmips. Various of these institutes routinely offer academic or professional training in geospatial analysis.

Australia

Army Malaria Institute
Cotton Research Institute

Brazil

INPA – Instituto Nacional de Pesquisas da Amazonia

Canada

Institut de Technologie Agroalimentaire

China

Chinese Academy of Forestry

France

Institut Français de l'Environnement

Greece

Institute Geologic Mineral Exploration

Italy

Forest Tree Breeding Institute

Japan

Niigata Agricultural Research Institute
Kyushu Institute of Design
National Institute for Rural Engineering
Kyoto Prefectural Institute of Tea
National Institute of Bioscience and Human Technology
National Institute of Livestock and Grassland Science
Himeji Institute of Technology
Yamanashi Institute of Environmental Science

National Research Institute
Public Works Research Institute
National Research Institute of Agricultural Engineering
Tokyo Institute of Technology
Institute of Physical and Chemical Research
Institute of Applied Geography
Forestry and Forest Products Research Institute
Institute of Geoscience/AIST
Nippon Institute of Technology
National Institute of Agro-Environmental Science
National Institute for Land and Infrastructure Management
Hokkaido Forestry Research Institute

Mexico

Instituto de Ecología de Estado de Gto

Portugal

Instituto Portugues de Arqueologia

Spain

Instituto Cartografic de Catalunya

Switzerland

Geographic Institute

Taiwan

Institute of Harbor and Marine Technology

Turkey

Geodesy and GIT Institute

Uganda

Makerere Institute of Environment and Natural Resources

United Kingdom

Institute of Animal Health
Institute of Terrestrial Ecology
The Macaulay Institute

Academic Institutions Using the Professional TNT Products

These are just some of the academic institutions that have purchased TNTmips under the SAL program or as commercial licenses. Many more not shown here use the FREE TNTlite as the basis for teaching geospatial analysis or one of its component technologies, such as GIS or remote sensing.
