

Styling Multiple Marked Labels

DID YOU KNOW . . . you can style more than one label at a time?

What Styling Multiple Marked Labels Gives You

- Select the labels to style using various selection methods
- Create new styles for various sets of labels
- Choose to apply style changes to all or marked labels

In the illustration above, four labels were marked and assigned a new style.

Click on the Marked button to apply operation to the marked labels.

 Edit Style icon

The Edit Style icon opens the Style Editor window where you can create new styles and edit the existing ones.

How to Style Multiple Marked Labels

- Open the vector object to edit in the Editor.
- Click on the Edit Elements icon in the Vector Tools window.
- Select multiple labels by any means.
- Click on the Label Attributes icon in the Edit Elements window.
- Click on the Edit Style icon to open the Style Editor.
- Create a new style and close the Style Editor.
- Select the new style and click on the Marked button.
