

Traffic jam on your upgrade path?

Ready! Set! *wait.*

When will the bugs be fixed? When will the new features arrive? With some software, you just never know. But with TNTmips, you get an upgrade **every quarter**. TNTmips 6.0 was delivered in November of 1998. That's **45 quarterly upgrades** since MIPS V0.9 appeared in 1986. And if that's not fast enough for you, you can download a new development version from our web site twice a week. Get into the fast lane. Experience accelerated software development for accelerated productivity.

The TNT products from MicroImages, Inc. for advanced geospatial analysis, desktop cartography, GIS, and image processing.
