

# Direct Use of CAD Files (\*.dxf, \*.dgn, \*.dwg, \*.tab)

**DID YOU KNOW** . . . you can directly view and use CAD files in DXF, DGN, DWG, and TAB formats in the TNT products?

## What Directly Using CAD Files Gives You

- Automatic display without importing files
- View without altering original files
- Show DataTips from available attributes
- Select files for any TNT product or process
- Georeference is supported when linking

Format	Extension	Description
DXF	*.dxf	AutoCAD eXchange format
DGN	*.dgn	Intergraph MicroStation format, internal georeference
DWG	*.dwg	AutoCAD internal format
TAB	*.tab	MapInfo internal format

## How to Directly Use CAD Files

- Double-click on the file if TNTmips is assigned as the default application.
- Right-click and use Open With option to select TNT product.
- Browse to and select file in any TNT product Select Objects dialog.
